

CERApresso-MAX

A professional, portable electric espresso machine with a **58mm** large-capacity portafilter basket

Exterior Design Inspiration

Inspired by the classical Roman columns, CERApresso-MAX boasts an artistic columnar silhouette with vertical fluting that enhances slip resistance and visual appeal, balancing aesthetics and practicality.

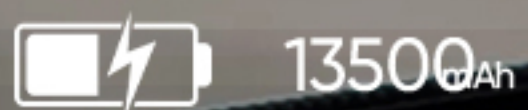

Commercial-Grade Extraction

With a commercial-grade coffee machine structure, CERApreso-MAX enables a maximum pressure of **20** Bar, coupled with a **58mm** metal portafilter basket, making the oils fully released for a strong flavor of coffee. It caters to coffee enthusiasts' pursuit of high-quality coffee machines.

Three-step Simple Operation

CERApresso-MAX is easy to operate. It requires only three steps to brew a rich espresso shot: load the grounds, press the button, and start extraction. It is user-friendly for both beginners and seasoned enthusiasts.

Long-lasting Battery Life

CERApreso-MAX is armed with a high-capacity **13,500mAh** battery that supports fast charging. It also delivers rapid heating performance—boiling 50ml of water in just 2 minutes. On a full charge, it can heat up to 9 cups (50ml each), maximizing energy efficiency. With these features, this espresso machine reduces wait time, enhances convenience, and optimizes the outdoor experience.

Intelligent Control for Enhanced Interaction

The mobile APP adjustment allows users to adjust various parameters such as temperature via their mobile phones, enabling remote control and personalized settings. Moreover, through an intuitive visual interface, they can monitor the coffee extraction process in real time. This "remote and visual" interaction mode overcomes the time and space constraints of traditional coffee machine operation.

High Flexibility in Outdoor Scenarios

CERApresso-MAX features a built-in heating system capable of operating with both cold and hot water, flexibly adapting to various outdoor scenes. It comes with a smart LED indicator and an alarm buzzer, which will inform users of its heating status in real time.

Washable Espresso Machine

With optimized and upgraded components, this compact espresso machine delivers an exceptional coffee-making experience while enhancing operational convenience in outdoor scenarios. The main unit and accessories are easy to clean with water, maintaining hygiene during outdoor use.
